

Kajal Kaithwas

Frontend Developer

I am a frontend developer and aspiring software engineer, currently pursuing a degree in AI and Data Science at GGSIPU. My passion lies in crafting user-friendly web interfaces, and I also have a strong focus on Data Structures and Algorithms (DSA). Through dedicated practice, I have developed proficient problem-solving skills, allowing me to approach complex challenges with precision and creativity. My academic journey in AI and Data Science has further enhanced my analytical thinking. I aim to merge my frontend development expertise with DSA proficiency to create innovative and intelligent software solutions, driving innovation in the ever-evolving tech landscape

Experience till now:

○ 2022- 2023

1st year

Fundamentals and Exploration

In my first year, I balanced academic excellence with building a strong foundation in web development. I honed essential skills like HTML, CSS, and JavaScript, merging theory with hands-on experience. This sets the stage for an exciting future in web development, where I can create innovative digital experiences

○ 2023- 2024

2nd year

Projects & Hackathons

During the following year, I dedicated myself to project development and team collaboration. I actively engaged in hackathons, working closely with my team to tackle exciting challenges. These experiences allowed me to apply my skills, innovate, and gain valuable real-world insights. I'm thrilled to continue this journey, where teamwork and hands-on projects will further enhance my capabilities and contribute to my growth as a developer.
